A Letter to Those Who Make Wishes

BELOVED friends,
I admire your perseverance for practicing the core methods with prayers or worship to seek faster ways for making wishes come true!

From today on, read this book avidly and practice constantly. When sleeping, put this book under your pillow and let the good thoughts accompany you to sleep. Sincerely utilize the book and its methods; if you wish, you can also share *Super Life Secret Codes* with friends around you. As long as you are completely sincere and you can adjust your attitudes to the same level as the book, then your wishes may come true, as long as they do not bring harm to others or society. When you accept the Universe's blessings, your fate, knowledge, and random encounters will all change for the better. Hold on to each and every opportunity because the brightest road stands right before you.

To make a wish directly to the Universe without an intermediary will bring you greater joy at the end because it does not require any ceremonies or money spending, and it saves time, does it not? I sincerely wish you luck on achieving your goals.

Sincerely,

Great Sun
