

## POSTSCRIPT 2

### *A Letter to Those Determined to Diligently Practice the Book's Methods*

**N**EWLY enlightened students of the Universe,  
Congratulations on obtaining new vast knowledge! Your decision to walk the right path towards the next century has instantly changed your future encounters. After all, only a few people can become truly enlightened, which means you already have a steady foundation in the study of the Universe helping you clearly see the truth behind each encounter.

From today on, if you can remain sincere and learn according to the book's methods, you will witness changes in your life that will help you gain more in life, if you practice with diligence and perseverance. When you have improved or succeeded, instead of boasting about your achievements, transfer them into deep appreciation to help others gain the benefits of this book. That will bring you more joy in life.

The first requirement to practice the methods in this book is to own an authentic copy of *Super Life Secret Codes*. I have personally sealed every genuine copy of *Super Life Secret Codes* with an invisible layer of the secret code to success. When you sincerely practice the book's methods, the secret codes interlock with those you learn from the book to open more life changing opportunities. There is no limit to the amount of time,

place, or frequency you must use this book; only a heart that truly values what has been learned is required. The book's teachings and discussions do not conflict with any religious teachings; after all, if both parties provide the truth, then there should be no conflict. Try practicing in a calm and quiet place. If life does not allow spare time to be in such places, then try practicing anywhere; no ceremonies are required to practice, the main point is whether or not you can reach that state of mind.

In the future, if you become successfully practiced at these methods, please refrain from opening a class to teach others. Everyone has a different fate, as long as they practice diligently with their own genuine copy of *Super Life Secret Codes*, the Universe will be able to connect with that person. Some may learn faster and may even achieve a higher state of mind than others. Do not mislead the general public; it will only ruin both your future and theirs! When you see others reaching a higher level than yourself, giving them your true blessings will benefit you in your learning! If you come across a question or problem during your practice, continue your practice sincerely; the Universe will eventually answer or resolve troubles for you. Prevent yourself from over-worrying and being overwhelmed by the unknown. Just wait patiently, everything will naturally come to you as you practice and achieve.

Sincerely,

Great Sun
