

## POSTSCRIPT 7

### *A Letter to The Wealthy*

**T**HE financially capable public, along with the Universe's love for you, you have had the opportunity and made efforts to obtain the wealth you currently have. Most people would admire your wealth, but have you ever given gratitude and treasured your gifts from the Universe? Just think, there are many people who work harder than you and even sweat or shed more tears than you; however, as a result of multifarious complex circumstances, they may still be struggling day and night. Yet, you have already succeeded because luck has been on your side, watching over you. Therefore, every thought and decision in your life, from now on, may impact your advancements and wealth in the future.

There are a lot of wealthy people who do not appreciate their fortunes. They view money as nothing more than the means of obtaining what they want; to them, money can buy everything and anything they desire. It has gotten to the point where they believe money can help them avoid the law and punishments. There are other wealthy people who view those less financial stable as their slaves, always looking down on them. Or there are stingy, wealthy people who act as if they are willing to help, but in reality they squeeze every penny possible from people. Nevertheless, when people become wealthy, they tend to lose humanity and appreciation for other people or things. Their vanity is one of the main causes of social problems.

I believe you are different from those types of wealthy people, or else you would not have had the patience to read up to this page. Here I want to remind you of a beneficial tip, and I hope you can all treasure it! The imminent start of a new era means a lot of variables are being shuffled around. The riches you have now may be gone due to various reasons such as luck or employment problems. Only those who understand the urgency and importance of our times, and utilize their finances to spread the idea of love and gratitude to everyone, can leave the Universe with a good impression. Whether it is to advertise, publicize with a celebrity, print books, or produce films, use whatever means you can to encourage the public to act in unison. If you have the sincerity, with time, you will know that your efforts were worth it. If you do not have an idea of what you can do, you can purchase *Super Life Secret Codes* in high quantities and give them to people whom you feel an affinity with.

Right now, donating money to disaster areas does not seem to be helping. Sometimes unnecessary donations will only go to waste if it was not needed. We are quickly approaching the new decade, if you have the ability or the money and wish to help people understand and change lives then I encourage you to practice the book's methods. Set your goal, persevere, and let the Universe guide you.

Sincerely,

Great Sun
